SKILLS

JavaScript

Typescript

Golang

Python

React

HTML/CSS

Node.js

Vue.js

Version Control (Git)

Linux

MySQL, MongoDB

AWS

MaterialUI

Rust

Agile (SCRUM)

PROFILE

3+ years of experience in full-stack engineering, web development, leading successful project deliveries, improving user engagement and application performance, and delivering projects on time with an increase in customer satisfaction.

EMPLOYMENT HISTORY

Senior Frontend Engineer, Invo Technologies

Jun 2023 — Dec 2023

- Constructed robust analytics pages on the dashboard, enabling users to effectively interact, sign up, and log in. Delivered real-time insights on revenue generation, player behavior, and spending patterns for strategic decision-making in game monetization.
- Collaborated with the blockchain team to integrate front-end features with backend blockchain technology. Utilized Rust and Polkadot.js for seamless blockchain interactions within the platform.
- Spearheaded the design and implementation of the Developer Dashboard using React, Redux, D3.js, and TypeScript. Ensured an intuitive and responsive user interface that enhanced user engagement and experience.
- Leveraged Jira for efficient project management and Adobe XD for designing compelling user interfaces and experiences.

Full Stack Engineer, Pepperlabs

Budapest

Florida

Jan 2023 — Present

- Collaborate with cross-functional teams to develop and enhance web
 applications using JavaScript, HTML, CSS, and React, resulting in successful
 project deliveries.
- Implement responsive and user-friendly UI components, ensuring optimal user experience across multiple devices and browsers, resulting in 45% increase in user engagement.
- Conduct thorough testing and debugging to identify and resolve issues,
 resulting in 60% improvement in application stability and performance.
- Employ Git for version control, actively participate in Agile development processes, and contribute to the code reviews and pull requests, ensuring a high-quality codebase.
- Assist in the deployment of applications to production environments, utilizing Docker containers for streamlined deployment processes, resulting in the reduction in deployment time and increased efficiency.

Full Stack Engineer, Silicon Bear

Oct 2021 — Jan 2023

- Design, develop, and maintain robust and scalable web applications using JavaScript, TypeScript, React, HTML, and CSS, ensuring a high-quality user experience.
- Utilize Node.js and Golang to develop efficient and secure RESTful APIs, facilitating seamless integration of frontend components with backend services.
- Optimize application performance by implementing efficient algorithms, caching strategies, and database query optimization techniques, resulting in a 45% improvement in page load times.
- Implement secure user access and authentication systems using Firebase, enhancing application security and safeguarding user privacy.
- Collaborate with designers and stakeholders to translate wireframes and design mockups into functional web interfaces, delivering projects on time with an increase in customer satisfaction.

Frontend Engineer, Shoppyverse

Oct 2020 — Mar 2022

- Collaborate with cross-functional teams, including blockchain engineers and designers, to understand project requirements and translate them into scalable and efficient frontend solutions.
- Implement blockchain integrations and functionalities into frontend applications, ensuring seamless interaction with smart contracts, blockchain networks, and decentralized protocols.
- Collaborate with UX/UI designers to create visually appealing and intuitive user interfaces, ensuring a seamless and engaging user experience in the blockchain applications.
- Ensure the security and integrity of frontend applications by implementing appropriate security measures, such as encryption, authentication, and access control, to protect user data and interactions within the blockchain ecosystem.

EDUCATION

Computer Engineering, Federal University of Technology Akure

Akure

Jan 2017 — Feb 2021
